Multi-Force Dashboard Presentation (2019-2024)

Transitioning from raw regional crime tracking to an interactive, self-service operational deployment tool

Strategic Context

- Dashboard tracks over 8.4 million total recorded crimes across a 6 year span
- Covers four forces: Metropolitan, Surrey, Sussex, Thames Valley
- Cross-force benchmarking
- Tracking trends throughout quarters to pinpoint exactly when changes should be made to current strategy
- Addresses regional data variety

Structure & Layout

- 2 Tier Dashboard
  - Macro Overview (Page 1)
    - Track core force-wide metrics at a single glance
    - Shows population-normalised comparisons and tracks overarching crime drivers over time
  - Drill down view (Page 2)
    - Enables isolation of individual forces for targeted analysis
    - Investigates localised deprivation scores, pinpointing geographic clusters and quarterly demand patterns

Interactivity & Navigation

- Dynamic slicers to adjust the visualisations to the exact police force, year, type of crime and quarter when required
- Cross highlighting capabilities (highlight a forces footprint across other visualisations)
- Hover tooltips for trend context of crime types
- Built for safe, intuitive self-service

Key Insights

Cyclical seasonal wave: Peaks at Q3 and drops during Q1

Socioeconomic Correlation: Positive correlation between deprivation scores and crime rates per 1000 residents

Primary volume driver: "Violence and sexual offences" represents the leading crime type

Next Steps

Predictive Deployment

Tactical Interventions

Continuous Monitoring

Next Steps

- Adjust resource allocation by quarterly trends
- Provide more support to the police forces with higher deprivation scores
- Target the hotspots
